

## MANAGED FILE TRANSFER HOSTED PROOF OF CONCEPT

### The Problem

Selecting the right Managed File Transfer (MFT) solution is critical for ensuring secure data transfers, compliance, and operational efficiency. However, it's challenging to fully evaluate a solution without testing it in a real-world environment.

### The Solution

HANDD Business Solutions (HANDD) offers a Hosted Proof of Concept (POC) service that provides a fully configured MFT environment where you can test the platform with dummy data. This enables you to explore its features and functionality before making a long-term commitment.

### How does HANDD's Managed File Transfer Hosted Proof of Concept Service work?

- Our team provide a fully configured hosted MFT environment for a two-week POC.
- Full administrative access for configuration and testing granted.
- We create a customised testing plan aligned with your business needs, along with expert consultations during the POC.

### Key Features and Benefits:

- **Full administrative access** for hands-on platform testing
- **Hosted environment** on secure infrastructure
- **Simulated real-world testing** with dummy data
- **Tailored test plan** to match your business processes

### Why Choose HANDD?

With extensive MFT implementation experience, HANDD ensures your POC reflects real-world use cases, offering end-to-end support from setup to final review and employing a proven methodology for thorough testing of all critical solution aspects.

*Pricing is based on a two-week consultancy fee for this service. To discuss your requirement, get in touch at [info@handd.com.my](mailto:info@handd.com.my)*
